

FLUSH SNAP CHANNEL (AIRELIGHT™ LINEAR ES 1.0)

FLUSH SNAP CHANNEL (AIRELIGHT™ LINEAR ES 1.0)

DESCRIPTION

The Flush Snap Channel for the Airelight™ Linear ES 1.0 provides an optimal solution to embed lighting in drywall and other building materials. Constructed of anodized aluminum, the Flush Snap Channel is low profile and light weight, providing ultimate flexibility for the lighting designer. Utilizing a 1/2" reveal, the Flush Snap Channel allows for easy installation into the desired building material. With multiple mounting options, the Flush Snap Channel can adapt to many embedded lighting projects. Spring mounts attach the channel to any drywall surface. When springs cannot be used, simply glue the channel in place. Stylish aluminum endcaps finish the in wall luminaire assembly. Once mounted into the selected building material, the attachment clips on the Airelight™ ES Linear simply snap into the channel, providing easy integration and a secure attachment.

Applications: Embedded lighting in drywall for Office, Residential, Industrial, Retail, etc.
